

Basic Sponging

A great way to add warmth, dimension, distress & aging to your image

1. Starting from edge of CS, ink Sponge with colour, holding CS on desk with one hand, sponge in the other, begin sponging from off CS edge by moving sponge over edge of CS using large circular motions. Continue until happy with depth of colour
2. Changing *Sponge*, continue sponging 2nd Ink colour blending a little where the 2 colours meet
3. Continue with as many *Ink* colours as you wish
4. Stamp Image direct over sponged CS

Tips

- Do not apply too much ink at once as you are unable to remove ink once applied. It is best to start off light & go dark
- Inking your sponge too much to start off will result in a darker sponged area
